PERSONAL PROFILE

I am looking for work in Software Engineering or Software Development. I am an IT professional and veteran. One of my best traits is to not give up on a problem no matter the circumstances until a viable solution has been presented. Go to my deployed GitHub page portfolio to see all my programming skills and languages that I have, displayed utilizing React.

WORK EXPERIENCE

Web Programmer/Developer

comingsoonhomes.com | Aug 2021 - present

- Designed/implemented features for comingsoonhomes.com via PHP, JS, HTML, CSS using Apache Servers, CodeIgniter Framework, MySQL Database and GIT as source control
- Implemented Multiple select2 boxes that utilize Ajax for remote data and are filtered by custom query parameters and conditions, including the homepage search box.
- Doubled website speed performance by enabling GZIP compression.
- Redesigned website pages and functionally.
- Developed a data to xml converter and wrote cleanup scripts/jobs to remove old files.

Tactical Air Control Party Specialist, United States Air Force.

Fayetteville, North Carolina | Dec 2015 - Jun 2021

- Managed and operated GPS, voice, and digital combat communication weapon systems.
- Supervises and conducts mission planning and coordination of combat air resources.
- Supervises and performs interservice liason activities to ensure effective integration of combat air resources on the battlefield.
